#### **DETAILED ACTION**

### Claim Objections

Claims 4-14 and 19-21 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3, 15, 16 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 15 and 22 are indefinite since it is unclear as to what is being claimed. They fail to positively claim the invention. Further, they are in improper format. Claims should not refer to the disclosure or drawings. Perhaps the claims should be canceled. Claim 1 is indefinite since "the power supply" on line 6, "the respective part" on line 9, and "the first" on line 11 lacks proper antecedent basis. Claims 2, 3, and 17 appear to be contradictory; i.e. the claims recite that the angle is oblique, and preferably perpendicular. Which is it? Claim 16 recites "or" on lines 3, 6, 11, and 15. This is indefinite. Are the elements being claimed or not? Claim 16 is indefinite since "the first" on line 10 lacks proper antecedent basis. On line 13, the recitation of "arrangement cooperates" appears to be incomplete; i.e. "cooperates" with what? On line 15, "a tool"

is claimed. Is this the same "tool" already claimed previously in the claim? The remainder of the claims should likewise be reviewed.

## Allowable Subject Matter

Claims 1-3, and 16-18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bongers-Ambrosius et al., Gass et al., Horiyama et al., Habedank et al., Carrier, Smith, Reibetanz et al., Lechner, Hirdes, and Bixby et al. disclose similar tools.
